About This Game

Radiation Island is a survival adventure game where you craft your own destiny in a huge open world environment. As part of the Philadelphia Experiment you have become stranded in a parallel, alternate reality. Discover this new and mysterious world, with all its surprises. Use everything you find to survive it and solve its puzzle to get back to the real world.

Follow your own path in an environment of breathtaking beauty and gigantic scope. Explore huge forests inhabited by dangerous wolves, bears and mountain lions. Investigate abandoned villages and old military compounds where zombies guard vital tools, weapons and clues to the secrets of this world. You can even swim and dive, if you can avoid the hungry crocodiles.

Hunt wild animals, fish or gather fruits to overcome hunger. Mine for resources and craft weapons, tools and basic vehicles. Find hidden treasures, equipment and fire arms to prevail in a world full of perils: radiation, anomalies, harsh weather and enraged zombies.

Experience the full day-night cycle and face the dangers of darkness and cold.

love this game cannot rate it enough. The graphics are outdated but the game play and storyline make it so fun to play. Would love to see a revamp of his game!! 10\/10 would reccoment purchasing it for its low price.. love this game cannot rate it enough. This game is scary as hell. If you are bored of all of your other games and you need a pinch of horror and survival, this is it.
I would rather pay $2 for the game than 10 but oh well. Sadly the graphics and lack of updates really is a negative.. This game is scary as hell. If you are bored of all of your other games and you need a pinch of horror and survival, this is it.
