About This Game

Minimal is unique logic game with simple controls and addictive gameplay. There is no story, no clutter - everything is simple, minimalistic. Whole game tries to keep you focused on one simple goal, which is solving current puzzle.

To solve the puzzle, you need to click on a tile to change the colors of its neighboring tiles so that the expected pattern is reached. We have prepared **lots** of challenging levels, each including a PAR that displays the minimum number of turns necessary to complete the level. While appearing deceptively easy, the gameplay gets progressively harder to ensure the player is challenged at all times.

Minimal is very challenging and it will require a lot of brains to solve all the content. But don't worry, if you get stuck you can always go to other levels and come back later.

Awesome puzzle game. Really not for the weak minded. But the good part is, if you ever get stuck in a level, you can try other branches to get to the next level. And it is even better to play with the steam controller. :). After going through puzzles up TIER 16 (each tier has progressively more puzzles per tier), and i gotta say it gets really repetitive, until that point there were no more gimmicks or add-ons that makes the puzzle feel more intricate, except on a select few maps there is this mirror affect where if you activate one tile on one side the counterpart also activates. Its just to bad that this really feels frustrating to try and plan around.

So sadly already this game is worse than a free puzzle game on my phone :V

To add insult to injury the game is roughly 80 tiers of around 5+ levels per tier, so even if you get more features as you progress it will drive you mad trying to actually complete such a long game that has the excuse- oh sorry i mean "theme" of being minimalistic, ergo there is nothing but these 400- puzzles, no soundtrack, no visually pleasing background, no clever story supporting it. nope just you doing puzzles for 3u20ac.

I will disclaim that as puzzles go im really not a big fan of this particular puzzles style either, all it is, is clicking a tile and the 9 adjacent tiles "activate" and activating an activated tile deactivates it etc.

Im also going to mention the difficulty is really out of control. And i get that you might think im just dumb but thats not what i really mean, what i mean is for some reason the creators thought itd be smart to make certain tiles nonn clickable, so you are actually limited in what options to solve the puzzles wich makes the puzzles with kind of obvious patterns to become actual no-brainers. But at the other end some puzzles can have you just sit there and rageclick hoping to make yourself see the pattern.

bottom line is, if you like the nine tile activation style puzzle enough to do roughly 400 the go ahead, but if you are skeptic or just curious i really do recommend not bothering and instead getting one of the hunderds puzzle apps for your phone or just go to google and type in "free puzzle game" and chances are itl be just as good or even better..
